

## **PEAK GROW™**

**Premium Puppy Formula and Dog Milk Replacer. Give Your Puppy a Healthy Head Start and Sound Foundation for Life.**

**"Grows Your Puppy Like a Mother!"**

Genetics aside, birth and puppy hood are the weakest link to superior adults. Major advances in human infant nutrition increase not just survival, but health. APRL goal was to develop the ultimate puppy growth supplement and breeding bitches in Peak Grow™.

PEAK Grow™ is the first predigested formula designed to duplicate the powerful immunity and connective tissue growth factors in dog milk. PEAK Grow™ supplies vital immunity and connective tissue factors like alpha/beta caseins, Glucosamine and more. PEAK Grow™ will help to grow your puppy structurally sounder, not bigger.

Recent studies yield the million-year-old chemical secrets of mother's milk. This provides us with the clues to actually reproduce it using human infant food technologies. As it turns out, canine milk is highly unique. To begin with, it's higher in protein which actually increases as nursing continues. Also, it's higher in zinc and other essential nutrients.

**We Copied Mother's Milk and Named it PEAK Grow™.** And we copied it closer than ever before! For example, the proteins in PEAK Grow™ reproduce the natural balance in mother's milk with each sub-protein provides it's own powerful advantages. We also added pharmaceutical-quality amino acids, probiotics, immune factors, vitamins, minerals, growth factors and more. These are found in only two formulas - mother's milk and PEAK Grow™!

**Sizes:** 1½ , 4 and 8 pound containers.

### **Puppies Thrive on PEAK Grow™**

By receiving "round-the-clock" growth nutrients, your puppy will get a huge head start in life. They literally glow with health and have boundless energy. PEAK Grow™ bolsters antibodies and immunity and supplies natural building blocks for

cartilage, ligaments and tendons. PEAK Grow™ is designed to duplicate the powerful immunity and connective tissue growth factors in canine milk.

### **For Mothers, Too!**

PEAK Grow™ concentrated nutrients are utilized by the mothers body to grow internal puppies, then to produce milk. In other words, her precious muscle, bone mass, organs and even coat are "spared" the usual breakdown. In fact, mothers actually increase shine, muscle and overall health and energy on PEAK Grow™. This in addition to richer milk with more antibodies!
